Uganda Budget Information Uganda Budget Information

Killa Designs provides the very latest Drupal 7 Responsive Design CMS Websites (Content Management Systems). Whether you are reworking an existing site or creating one from a clean sheet, our expert team will realise your ultimate website with you, on time and within an affordable budget.

Our sites are not only marketing tools, they are brands in themselves, creating a lasting impression on your visitors. Killa Designs / WebMania Digital Websites are designed in a fluid style so that site appearance and layout will automatically adjust to fit to all modern devices, be it a PC, laptop, iPad, iPhone or Android smartphone.

Your content will automatically fit images and text to adjust to each device's screen. You will no longer have to use pinch and zoom on hard to navigate sites where you often struggle to complete even a basic form when using a mobile device. All components on the sites that we develop deliver all text at optimum viewing size, thus negating the need to pinch and zoom. Navigation buttons are optimised for ease of use - simply tap via finger or thumb on any smart phone or tablet and enjoy the rich content our sites deliver page by page. On larger laptop and desktop screens all content expands to make full use of the traditional viewing area.

Precise attention is given to optimise all images to be as light as possible without pixelation. Page loading times are lightning fast even with slow Internet connections. The sites we design are extremely "Google-friendly" thus maximising your online visibility within search results. Advanced SEO techniques including comprehensive Google Analytics are deployed throughout and full social media integration is in-built with every site.

Site Testing

No site is complete without extensive testing for security, browser functionality and quality from our team of designers. In doing this, we make sure our clients are given the best quality sites which guarantee seamless end-user experiences providing form with functionality.

Hosting and Support

We pride ourselves in a comprehensive state of the art hosting platform. This gives you the advantages of quick operations and reliability and the best possible browsing and user experience.
